Dr. Joshua Lederberg
Biophysics Laboratory
Stanford University
Stanford, California

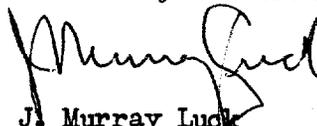

Dear Dr. Lederberg:

This is a confirmatory note regarding the meeting of the Editorial Committee on Friday, March 13. The meeting will convene at 9:30 A.M. for the purpose of deciding upon topics and authors for Volume 30, 1961. Those in attendance will be Allen, and Mackinney of the University of California, Floyd Daft of the National Institutes of Health, B.L. Horecker from New York University, Emil Smith of the University of Utah, Emil Stotz of the University of Rochester, and W.Z. Hassid of the University of California. In addition to yourself, we expect to have present with us, one or two other guests. We hope that you can be with us as much of the day as you find to be convenient. We shall have lunch together from about 12:30 to 2:00, and dinner from 6 o'clock on.

As I mentioned over the phone, one or two wives of the Committee members are expected to be coming to Palo Alto and will be entertained at dinner by Mrs. Luck. If Mrs. Lederberg is free that evening, we hope that she will join the ladies.

With cordial greetings,

Yours very sincerely,

J. Murray Luck
Editor
